See in color, even at night.

Struggling to see clearly in the dim light around your backyard at night? The EZVIZ OutPro makes late-night surveillance a lot easier. At night, the camera renders sharp black-and-white video, and can illuminate the surrounding area with its built-in spotlights to capture pictures in full color.

AI algorithm for alerts that matter.

The EZVIZ OutPro comes embedded with a built-in AI algorithm, which means it can identify and distinguish people from pets or other objects. This level of intelligence helps to greatly reduce insignificant alerts you might often receive with other cameras.

Actively guard your home.

The EZVIZ OutPro features the active defense function to provide an extra layer of protection. Upon detection of intruders, the camera will set off a loud siren and flash two spotlights* for on-site deterrence.

Hear and talk, as if you were there.

Via the EZVIZ App, you can easily greet your visitors, talk to the postmen, or verbally warn any unwanted trespasser at any time – even if you are away from home.

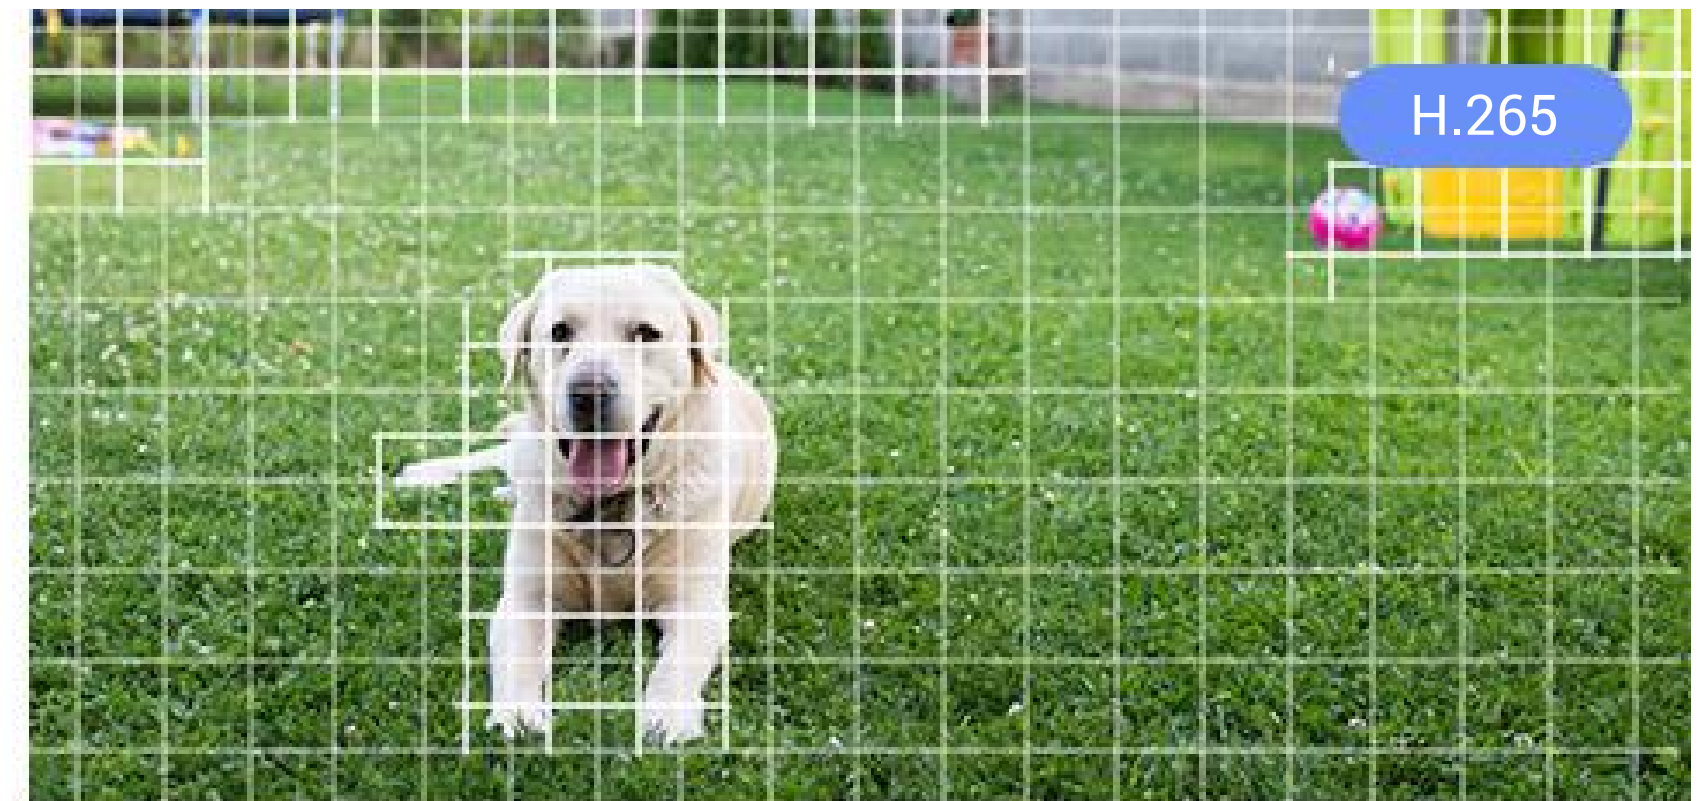

Durable in any weather.

With an IP67-rated enclosure, the EZVIZ OutPro ensures long-lasting performance even under the toughest weather conditions – whether it's rainy, stormy or snowy.

Save on storage space and reduce network loads.

With the advanced H.265 video compression technology, the camera achieves same or even better video quality with only half the bandwidth and half the storage space required by the previous H.264 video compression standard*.
